

# Precision -Loc™ soffit & wall panel

1" panel - Perforated with one rib - HR(color)PV

1" panel - Solid with one rib - HR(color)PR1

1" panel - Solid with two ribs - HR(color)PR2

1" panel - Solid flat (no ribs) - HR(color)PF

Precision-Loc™ is available in 26ga AZ50 painted Galvalume and bare Galvalume. Central States uses the CentralGuard™ paint system on all painted metals. Bare (non-painted) metals from Central States will have an acrylic coating. This acrylic coating helps protect the metal during manufacturing and installation. This clear organic treatment applied over the Galvalume coating is invisible, but provides enhanced performance applicability and retained heat reflectivity. There is no need for oils to be applied during forming. This organic treatment eliminates fingerprinting and foot marking during installation.

Precision-Loc™ 26ga steel is manufactured to meet ASTM A792 specifications for Galvalume and ASTM A653 for galvanized with a minimum yield of 50,000 PSI.

## PRECISION-LOC™ TRIMS

26 ga. only

	Part Number	Length	
<b>SOFFIT WIDE ANGLE</b>
