

CENTRAL SEAM PLUS™ Seaming Tool Rental Agreement

Thank you for placing your standing seam order with Central States Mfg. As you know, the panel you have ordered requires a seaming tool for proper installation. We would like to give you some basic tips in processing the seamer rental agreement that will help ensure a timely and efficient delivery.

- Tip 1: Please make sure you complete your Seaming Tool Rental Agreement in full. Any information not provided may cause a delay in the shipment of your seamer.
- Tip 2: When complete, please sign and date where indicated and return to your sales representative. Agreements without a signature will not be scheduled.
- Tip 3: Please allow a minimum standard lead time of 10 business days from the day the agreement is received by Central States until the date required on job site. It is advised that the seamer agreement be turned in with the panel order to ensure a coordinated delivery.
- Tip 4: We realize there will be occasions when a less than 10 day lead time is required. In those extreme cases, we will do everything to try and accommodate the request, however, we are limited to availability based on the date required. Your Central States sales representative must review availability before we can commit to your request.
- Tip 5: Rental charges begin the day a seaming tool ships and continue until the day that seaming tool is returned/received at Central States. Please make sure you do not incur additional charges by returning it immediately after use.
- Tip 6: Central States does charge freight in addition to the rental charges. Freight charges apply to each individual package shipped.
- Tip 7: Standard delivery time is two business days from the day the seamer leaves the Central States facility.
- Tip 8: The tools are shipped in a locked box and the combination is on the rental form.
- Tip 9: Return instructions are included on both the outside and inside of the box.
- Tip 10: When multiple seaming tools are being returned, please insure that all equipment is in the correct box. All boxes and equipment are labeled with a unique identifying number.
- Tip 11: Please return the seaming tools in a clean and working condition. Additional charges will be incurred for the repair of damaged and/or abused equipment and shipping boxes.
- Tip 12: Although you are solely responsible for managing the rental time frame, we may contact you on a periodic basis to insure that your project is progressing and that you are still in need of the seaming equipment. This is a friendly reminder to keep you from incurring additional cost on your project.

Our seaming tools are shipped on a first come, first served basis. Please take the proper steps on the front end of your order so we can satisfy your seamer needs.

Thank you for your order and for taking the time to read these tips. We hope it helps you in your future requests for seamers. Our goal is to provide you with a pleasant rental experience. Your feedback is encouraged and appreciated.
