

Central-Loc™

Standing Seam Roof Panel

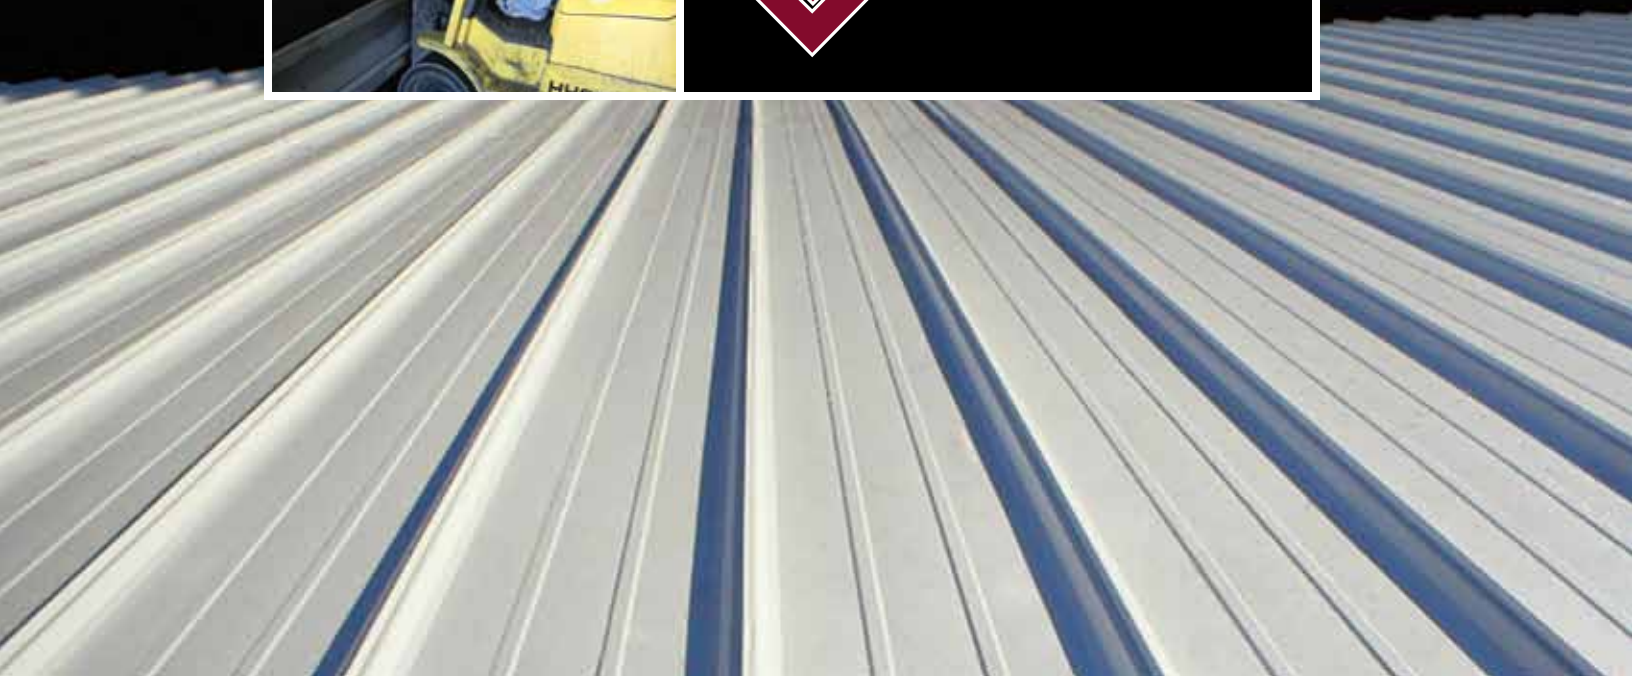

Central Seam Plus™

Standing Seam Roof Panel

**CENTRAL
STATES**
MANUFACTURING, INC.

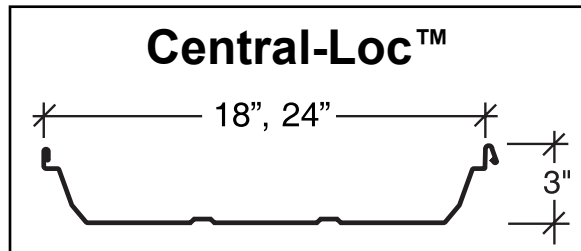

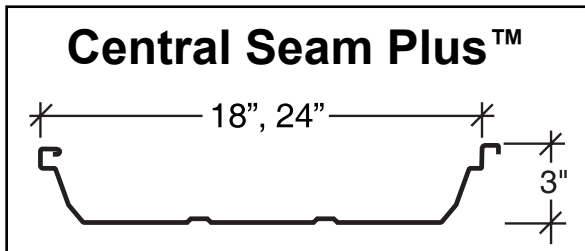

Central States offers two trapezoidal structural standing seam roof systems that are sturdy, fire resistant, increase real estate value, and hold beauty far longer than other roofing materials. Our snap together Central-Loc™ system and field seamed Central Seam Plus™ have a Galvalume substrate which offers two to four times the corrosion resistance of galvanized steel.

Comprehensive step-by-step erection manuals are available and come attached to each Standing Seam order. Central States also carries an extensive line of standing seam trims and accessories to compliment our panels.

Standing Seam Roofing Features:

- Both Central-Loc™ and Central Seam Plus™ begin and end in the high, reducing the risk of leakage at the rake.
- Available in 18” and 24” width panels. Longer lead times may apply. Check with your salesperson for more information.
- Factory applied sealant insures a weathertight and secure lap.
- Weathertight Performance Warranties available.
- 20 year Galvalume substrate warranty and 40 year limited paint warranty (both CentralGuard™ and Kynar 500®/Hylar 5000® available).
- Available in 24 gauge material (22 and 26 gauge material optional. Contact sales rep for more information).
- Central-Loc™ has 10 UL90 construction numbers, Central Seam Plus™ has 7 UL90 ratings and both carry UL Class A fire resistance rating and pass E-1592 wind uplift tests.
- Standing Seam panels can be used for both new construction and retrofit.
- Floating clips allow for thermal roof expansion and contraction during extreme temperature changes.
- Installation training available.

Product Applications

See our Standing Seam Product Guide for information on trims, gutters, accessories, load tables and warranties for these products.
