

# Residential Metal Roofing

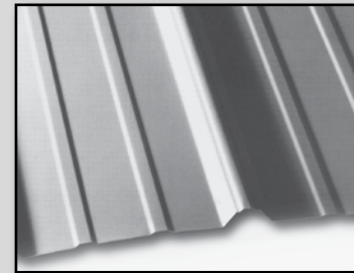

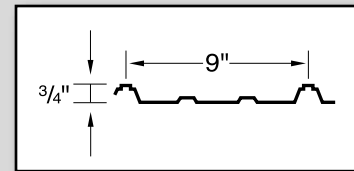

*Horizon-Loc*

This concealed fastener panel gives you the visually pleasing look of a standing seam roof for less. The panel's easy snap-on ribs attach rapidly with no hand seaming, so installation is less expensive than traditional standing seam. It is ideal for residential roofing and its durability ratings may lower insurance rates to save you money. Available in 26-gauge siliconized polyester.

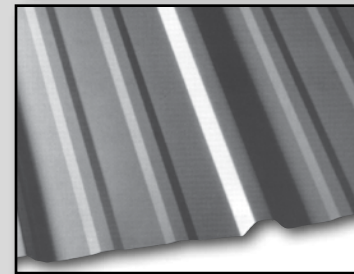

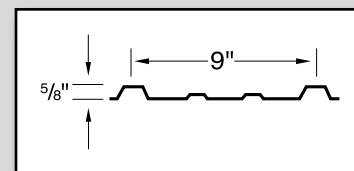

*Panel-Loc Plus*

Panel-Loc Plus provides the same durable performance as Panel-Loc, plus an added striation on top of the rib that gives it even more strength. The standard of excellence in the industry, Panel-Loc Plus gives residential roofs the protection of steel with an attractive appearance. Available in 26- and 29-gauge siliconized polyester or Kynar 500/Hylar 5000.

*Panel-Loc*

Looking for a strong, reliable low rib metal building panel from a strong, reliable company? Look no further than Panel-Loc from Central States Manufacturing. The classic panel for post frame barns and buildings, Panel-Loc can also be used in residential roofing and is available in 26- and 29-gauge siliconized polyester.

# Benefits of Metal Roofing

- Low maintenance
- Longer durability than traditional roofing materials
- Lower energy and insurance costs
- Environmentally friendly
- Quick installation

Metal roofing's durability can virtually eliminate the need to use future raw materials to produce roofing. It is practically unaffected by weather cycles and forces.

Central States painted metal panels are available with limited 40 year paint warranties which last 2-3 times longer than traditional asphalt shingles.

Most metal roofs have recycled content ranging from 25% to 95%. Conventional roofing shingles have much shorter lives and use oil-based products as their primary raw material. Metal also has the added benefit of being 100% recyclable if it is ever removed in the future.

Central States Mfg. is an employee-owned company that has been serving the central United States with exceptional customer service for over 20 years. We deliver the highest quality metal building components to our customers Right, On Time, Every Time.
