29ga only.

All colors meet ENERGY STAR® requirements for steep slope roofs.

† Weathering and appearance variation, including color, sheen, and spangle, is common in non-painted materials and is not a cause for rejection. For consistent appearance, choose a paint-finished product.

Colors on this chart are close representations of actual metal color, limited by printing and viewing conditions. Color matching is optimized for outdoor viewing.

# 5V™ is a proven favorite for historical districts.

This low-rib, exposed fastener panel is one of the oldest metal roofing profiles in the marketplace. 5V™ has a classic appearance and is especially popular in coastal areas. 5V™ is available in a variety of colors or unpainted steel to complement the vintage structures it is often paired with.

## CentralGuard® provides superior fade resistance.

CentralGuard is an advanced system engineered by Central States, to protect our metal against fade, dent, and rust. It combines the durability of ceramic and select inorganic pigments with the strength of a proprietary silicone polyester resin to deliver a durable finish, no matter the weather.

- Ceramic pigments are practically unaffected by acid rain and pollution.
- They resist color fade even in the most hostile environments.
- Silicone polyester resin resists dirt, staining and abrasion.
- Excellent fade and chalk resistance.
