

CentralGuard® with Texture

Upgrade to *texture* for a new depth of color and added durability.

Central States® now offers CentralGuard® with Texture. This new textured finish provides a depth of color never before seen on traditional metal panels. CentralGuard® with Texture combines a matte appearance with shimmering tones.

If you like the look of traditional shingles, then choose CentralGuard® with Texture, for a shimmering finish with all the benefits of a painted metal product.

- Same durable performance as CentralGuard®.
- Mimics the texture of shingles.
- Reduces the appearance of waviness, generally associated with metal roofing.
- More scratch resistant.
- More slip resistant during installation.

Unique textured appearance.

CentralGuard® with Texture offers you all the benefits of our standard CentralGuard® paint system, but features a sparkling visual appearance with a smooth touch. When CentralGuard® with Texture is installed on a building, you'll notice a deeper, richer color that changes subtly as the sunlight moves over its surface.

CentralGuard® with Texture

CentralGuard®

Durability proven through testing.

TEST PERFORMED	RESULTS	BENEFITS
ASTM D 3363 Measures the paint's resistance to scratching.	F to 2H	Excellent <i>protection against scratches</i> .
ASTM D 523 Measures the gloss of a paint at 60°.	<5	The <i>lowest of 7 gloss levels</i> , a traditional matte finish.
ASTM D 4145 Measure the paint's resistance to cracking when bent.	2T to 4T	Excellent <i>protection against crazing</i> during the manufacturing process.
ASTM D 3359 Measure the paint's adhesion quality.	No loss of adhesion	Superior <i>protection against fading</i> .
ASTM D 2794 Measures the paint's adhesion quality when impacted from underside.	No loss of adhesion, 3x ³ , metal thickness inch pounds.	Provides <i>long-lasting durability</i> against nature.
