Check our website to verify which colors meet ENERGY STAR® requirements for steep slope roofs.

Panel-Loc Plus™ - PRIME 29 ga.

Horizon-Loc™ - PRIME 26 ga.

*Copper Metallic panels must be installed in the same direction. See directional arrows or stickers provided on your panels. Color variation between orders is normal and not cause for rejection. Colors on this chart are close representations of actual metal color, limited by printing and viewing conditions. Color matching is optimized for outdoor viewing.

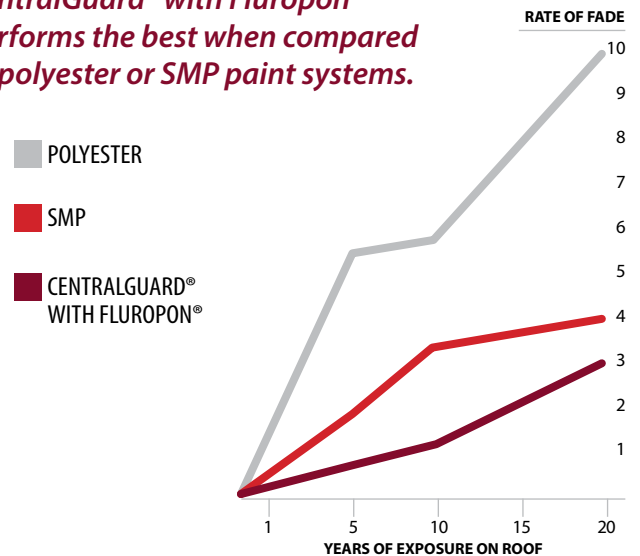

CentralGuard® with Fluropon® remains vibrant, year after year.

Fluropon® 70% PVDF is the undisputed champion for color fade protection. Colors remain vibrant even when exposed to damaging UV rays and moist environments such as rain, dew, fog, acid rain, and chlorinated air.

CentralGuard is our specific combination of everything that goes into making the highest-quality metal panels. Choose CentralGuard with Fluropon® for the best fade protection and a lifetime paint warranty.

- Color remains vibrant longer than traditional SMP paint systems.
- Minimal fading.
- Best for extreme weather conditions.
- Chalk-resistant formula.

CentralGuard® with Fluropon® performs the best when compared to polyester or SMP paint systems.

Fade is measured in Hunter units. One Hunter unit denotes the smallest degree of color change visible to the naked eye. Lower numbers are better and mean less fading. Notice how CentralGuard with Fluropon fades much less than other paint systems and at a slower rate over time.

NEW & IMPROVED!
